

PROFESSIONAL SUMMARY

Innovative full-stack software engineer and technical leader with expertise in enterprise automation, AI integration, and modern web development. Proven track record of building scalable solutions using Node.js, NestJS, .NET, SQL, MongoDB, and Microsoft Power Automate while integrating complex third-party APIs and real-time monitoring systems. Excel in independent problem-solving, rapid prototyping, and translating complex business needs into robust technical solutions. Passionate about emerging technologies and committed to continuous learning in AI, automation, and modern development frameworks.

TECHNICAL SKILLS

- **Programming Languages & Frameworks:** TypeScript/JavaScript, Node.js, NestJS, React (Next.js, Vite), Python (FastAPI, Pandas, spaCy), C# (.NET 9.0), Java (Spring Boot, Keycloak),
- **Databases & Data Management:** SQL (SQL Server, PostgreSQL), NoSQL(MongoDB), ORM (TypeORM, Entity Framework, Sqlalchemy)
- **Cloud & Infrastructure:** Azure (App Service), AWS (Lambda, EC2, DynamoDB, ECR/ECS), Microsoft Power Automate
- Git, Jira, Agile Methodology

PROFESSIONAL EXPERIENCE

834 LABS

Dallas, TX

Backend Engineer

11/2024-PRESENT

- Developing a comprehensive Customer Relationship Management (CRM) system from scratch as part of a two-engineer team.
- Building a C# web API backend integrated with PostgreSQL database to support core CRM functionality.
- Responsible for system architecture design, API development, database schema implementation, and full-stack backend development using .NET technologies in a greenfield project environment.

Tech Stack:

- Backend: C#/.NET Web API, ELK stack (Kibana, Elasticsearch), Third Party APIs (Zoho), AWS EC2, AWS ECS, Docker, NGINX

Front End Engineer

11/2024-PRESENT

- Architected, engineered, and deployed robust Node.js/NestJS application with MongoDB backend, successfully processing high-volume contract workflows (2,500+ contracts) while maintaining data integrity across multiple major insurance carrier integrations
- Architected comprehensive CRM proof-of-concepts from ground up, showcasing end-to-end development capabilities and deep understanding of health insurance business processes and workflow requirements
- Spearhead company-wide AI initiatives, providing technical guidance on MCP (Model Context Protocol) server implementations and architecting agentic AI integration roadmap for future project development

Tech Stack:

- Frontend: Vercel, Next.js, React, Angular, TypeScript
- Backend: NodeJS, NestJS, Redis, Third Party APIs, AWS EC2, AWS ECS, Docker

TEACHERS-PET.AI

Remote

Software Engineer, Founder

06/2024-03/2025

- Architected and developed comprehensive AI service enabling education professionals to deliver multilingual stakeholder reports through automated text-to-speech and audio file generation, streamlining communication workflows for diverse student populations
- Built full-stack application with user profile management, real-time translation capabilities, and audio file storage/download functionality, serving educational institutions' multilingual communication needs
- Implemented scalable microservices architecture using Python FastAPI backend with ElevenLabs AI speech synthesis and DeepL translation APIs, deployed via Docker containers on AWS infrastructure

- Developed responsive React/Next.js frontend with TypeScript, leveraging modern component architecture and state management for optimal user experience
- Applied expertise in API integration and automation workflows gained from enterprise RPA development to create seamless educational content delivery pipeline

Tech Stack:

- Frontend: Vercel, Next.js, React, TypeScript
- Backend: Python (FastAPI), ElevenLabs, DeepL, Docker, AWS

ROTATE TRANSLATION

Software Engineer - Full Stack

Remote
01/2024-05/2024

- Designing, planning, executing, and testing a Full Stack web application for clients to distribute information and process payment with scalability and efficiency in mind, resulting in a product that can handle up to 100 million users and 10 millions API calls per day.
- Tech Stack - Vercel (CI/CD capabilities); React, CSS, and TypeScript for Front-End, Stripe API (Application Programming Interface), NoSQL(Firebase) database for storing user information.
- Collaborated with the client to evaluate the most efficient product design and potential pain points for integrations with third-party services, resulting in an optimal, performant application capable of 1000s of users.

NEXTGEN IT STAFFING

Software Engineer - Intern

Remote
09/2023-03/2024

- Developing an open-source internal learning management system using Node.js, OpenLMS, and JavaScript for over 100 employees, resulting in a concise and organized structure for employee materials and learning resources.
- Collaborated with global teams to discuss pain points and best coding practices, as well as gathering and analyzing requirements based off of similar solutions (Coursera, Udemy), resulting in an extensive design for future success.
- Gained and documented user feedback through phone interviews and written documentation for continual for continuous integration.

EDUCATION

WESTERN GOVERNORS UNIVERSITY

Bachelor's Degree in Computer Science

Remote
2023 - 2025

- Certification in Linux

UNIVERSITY OF NORTH TEXAS

Bachelor's Degree in Music, Communication Studies

Denton, TX
2013 - 2017

LEADERSHIP ACTIVITIES

DSD Cohort Team Lead

DALLAS SOFTWARE DEVELOPERS

Remote, 02/2025

- Co-led cross-functional team of 6 software engineers in developing comprehensive apartment management and guest relations system, providing technical guidance and coordinating development workflows
- Managed project execution through Jira ticketing system, facilitating sprint planning, task prioritization, and progress tracking to ensure deliverable milestones and team accountability
- Led frontend architecture discussions and technical decision-making, leveraging full-stack expertise to guide UI/UX implementation and component design strategies
- Applied leadership experience from enterprise RPA development to mentor team members, conduct code reviews, and establish development best practices for scalable application architecture
